Re: **Island Lake - 0974540**
2012 Public Water Supply Inspection Report

Dear Ms. Herrmann:

An engineering evaluation of the **Island Lake** community water supply has been completed. A field inspection was made on April 11, 2012 by Segundo Nallatan of this office. Mr. Neal De Young was present during this inspection.

The Illinois Environmental Protection Agency conducts periodic inspections of all community water supplies to determine if their ongoing programs for monitoring, maintaining the water supply, and providing appropriate information to the water users meet the requirements of the Illinois Pollution Control Board's public water supply regulations and related standards. The reason for this work is that if the people in a community are to cooperate and use a common water supply, they must feel that their system is properly constructed, operated and maintained.

Since our most recent evaluation did not identify any deficiencies, your water system is apparently achieving this goal. I urge you to maintain this exemplary service to your customers. In addition, Island Lake is commended on its' exemplary facility maintenance and the professionalism and courtesy of its employees.

We also request that you review the enclosed "Public Water Supply Data Sheets". Monitoring requirements are determined by the information included on these data sheets, making it vital that you inform us of any errors or other inaccuracies.

We appreciate the cooperation and courtesy extended during this survey. Questions or comments regarding this evaluation should be directed to Segundo Nallatan at 847-608-3138.
