## SERVICE REPORT

Site Island Lake Date Jun 12, 2024

Service Task Description 2024 FasTest #3

Personnel Eric Mollahan

Wind 9 MPH Direction SSW Air Temps 87 F Sky Sunny

### COMMENTS

Three samples were collected for lab analysis. Samples were shipped following the visit. Rake tosses were performed in approximately 24 locations. No rooted vegetation was observed except in the north section of the lake which had a few curly leaf pondweeds and horned pondweeds present. Blue green algae was observed, and will likely reach significant levels in the next month.
